Course Evaluation Summary Statement

Relevant tables, reports, and written comments are on the following pages

I teach statistics and methodology classes so it should come as no surprise to discover that I enjoy analyzing data. My evaluations are no exception and the numbers presented here reflect a nearly complete set (except Fall 2009 and Summer/Winter courses) of student responses dating back nearly ten years to when the most recent survey tool was adopted. Table A is a summary from nearly 1000 student responses.

I understand the limitations of these surveys. I teach mostly majors and, therefore, my evaluations come from students who are in their chosen discipline. I have provided a color-coded comparative analysis as a matter of convention, but I recognize that students could have less favorable views of instructors who are teaching the general education classes that they would rather not take and that this, and other biases, could impact student perceptions in ways unrelated to the effectiveness of the instructor. For those reasons, I am not inclined to congratulate myself when a measure places me above global means. That said, I would be concerned to find that I fell far below the comparative means for a particular item and would certainly investigate possible causes. Each of us must balance the need to challenge students while keeping them engaged and encouraged.

A few things I've learned from student evaluations

In my view, student evaluations are best used as a within-instructor assessment tool, allowing us to see how student perceptions change over time and differ across classes. For example, Tables B and C show how my evaluations differ between the dreaded required statistics courses (Table B) and the non-statistics courses that I teach (Table C). In short, the students expressed lower interest in the statistics courses (7.3 compared to 8.6 for item #9) and, not surprisingly, also gave me lower instructor evaluations for almost all items, though still positive. Distributions of expected grades are similar for statistics and non-statistics classes, suggesting that course content, rather than course difficulty, accounts for the difference in evaluation scores. This is a remarkable example of how student interest in the subject influences perceptions of the instructor. Because of this observation, I employed a student-centered approach to developing classroom demonstrations. Four years ago, at the beginning of each semester, I started asking all students to write about their personal interests and career goals so I could tailor the classroom examples – as much as possible – to their interests. I have also used feedback from course evaluations to inform textbook selection. Even small gestures that demonstrate an appreciation for the students' personal interests and goals can dramatically improve their interest in a course.

Although I am not certain, my student evaluations might demonstrate how technology can improve student perceptions of "fairness." In my case, items like ***I met objectives and Graded me fairly*** (items #7 and #12) improved when I started using the D2L gradebook which allowed students to track their progress through posted grades, rather than calculating their grades based on returned papers. The improvements in these two items occurred even though the distribution of earned grades had not changed over the same period; rigor was not compromised. I have been particularly pleased to learn, through office meetings and data from individual courses, that students can admit that they fell short of expectations while acknowledging that those expectations had been clear.

Finally, I am happy that students recognize my very real enthusiasm for teaching (item #11) and that, even in the statistics courses, they believe that I encourage critical thinking (#2, #15). Above all else, I want students to understand the importance of embracing scientific psychology and recognizing the promise that an objective, scientific approach to human behavior holds. When my evaluation reports arrive, I would like to think that the students liked me and liked the course (Who wouldn't?), but those things are secondary - *and almost irrelevant* - if they tell me that I got them to ***think***.

What did you like about the course?

I liked that the course was easy to follow + that professor Gallagher made learning stats fun!

15

What could be improved?

Maybe take more time to focus on each subject.

What did you like about the course?

I liked feeling competent in math for once.

What did you like about the course?

All the examples provided in class and before test time.

What could be improved?

Lab activities could be shorter to be

What did you like about the course?

I liked how this professor gave us tons of extra problems to do for practice for the tests.

What could be improved?

Any other comments?

I really enjoyed Dr. Gallagher as a professor. He truly cares about his students.

What did you like about the course?

I liked the way the course was laid out, and his teaching style. Also, appreciated how much and how often you could go to him for help.

What did you like about the course?

Well structured. Made material as interesting as possible.

Any other comments ?

I hated this class the first time I took it but Gallagher makes the material more interesting and easier to understand.

What did you like about the course ? the chapters you wrote yourself were helpful and all the practice problems you gave were also helpful. Also I liked that you gave us topics to choose from for the project; that made things easier

What could be improved ?

What did you like about the course ?

I liked how the information was presented and assessed. I also liked the amount of time taken for each topic to be explained. I never felt rushed through the topic

What could be improved ?

Any other comments ?

Dr Gallagher shows a real concern for the entire students population, he engages ea student and meets them where they are. Dr. Gallagher seems to care about his student population in relation to reaching and achieving the stated goals as outlined in syllabus

What did you like about the course ?

Prof. Enthusiasm about the course made it fun to learn.

What did you like about the course ? The teacher was excited, made class exciting and understandable.

What did you like about the course ?

I liked that Gallagher, was interactive and helpful
He really showed he understood and cared about our grades and way of learning.

Thank you for your help with answering questions in a timely matter and showing a new perspective of how to think about math.

Any other comments ?

Although I hated this course subject, Dr. Gallagher was a great teacher. It was obvious that he loves teaching this subject because every class there was so much enthusiasm from him. Very glad I took this class with him.

Thank You!!

Any other comments ?

This class would have been hard to grasp hadn't the prof. been so knowledgeable in the subject. He made it GREAT.

Thank You!!

Any other comments ?

OKay... to be totally honest, out of the 3 stat courses I took already, none of it ever made sense till I took this class. I enjoy how much work you give us, because then we have to do it, and then we have to use our brain. What you could work on more is your pace. You zoom through it. Then I usually get lost & start daydreaming.

Thank You!!

What did you like about the course?

I liked the discussion. We talked about a lot of interesting topics.

STUDENT EVALUATIONS - Page 29

PSYC 246

What could be improved?

The amount of readings/videos per quiz, having 4-6 readings/videos for a 2 question quiz makes it very difficult to know what to focus on

SCANTRON DE Mark Reflex® EW-273017-3:12

ED06

(Over)

What did you like about the course?

I liked the format of the course in that Dr. Gallagher's lectures were interesting. I also liked that he applied the course info to things happening today.

What could be improved?

What did you like about the course?

The course challenged me to think about psychology in a completely new way. Most of the information was new to me and was presented in an interesting manner.

What could be improved?

Any other comments?

The course overall was interesting, although I wish there were less readings for the readings. Also, the exams were too hard, maybe if it were more structured the exams would be more simple.

What did you like about the course?

The enthusiasm for evolutionary and its practical applications were great!

What could be improved?

Dr. Gallagher really wants conversation in the class and I want to contribute but I honestly can never think of anything to say because he has already said it all.

Any other comments ?

Perfect use of videos, lectures, lab work. Divided and varied well to flow and mix things up. Fit well into the four week summer class.

Thank You!!

What did you like about the course ?

I liked that it incorporated statistical analyses so that it was reviewed and you couldn't forget how to do it. I also liked how the materials all seemed to come together to constantly reinforce concepts because it made it easier to remember.

What could be improved ?

I would have liked to cut down some of the additional readings (articles). It was a lot of work for a 4 wk course and could get overwhelming at times.

(Over)

PSYC 314 (11)

Any other comments ?

I really enjoyed the class. Information presented in class was done in a way that kept me interested & I found the book useful for concepts I didn't initially understand. Dr. Gallagher's enthusiasm for the topic greatly helped in making it through a 5hr class.

Thank You!!

Any other comments ?

I really enjoyed the class and learned a lot. It was an intensive summer class but I am glad I took it with Dr. Gallagher. He really knows his stuff & cares about his students!

What did you like about this course?

I liked how Dr. [Name] kept your attention. Very animated in his lectures, good examples to increase understanding of terms.

What could be improved?

Being a summer class I know it had to move fast, but I would have liked to understand the CogLab's a

What did you like about this course?

This course taught me a lot about the way the mind works and fueled my interest in psychology. Abducted was a useful tie-in to the textbook material and is argueably the best book I've read as a course requirement! Really interesting! 😊

What could be improved?

I would have liked to learn more about how the imagination works.

Any other comments?

4 weeks / 4 credits, you made it worth my time. Thanks.

Any other comments?

Thank you for making my last class an enjoyable one!

Any other comments?

class was very organized & I enjoyed myself thoughtfully

Any other comments ?

I really enjoy this class and learning about this subject. Dr. Gallagher does an excellent job using examples to explain concepts and makes the subject fun and interesting. I like the experiments we do in lab, although I find the lab assignments a little challenging. However we are given a good amount of time to complete them.

Any other comments ?

Great professor, he definitely cares about the material being taught and does what he can to make sure everyone understands everything.

Any other comments ?

Dr. Gallagher uses his humor to always keep the class interesting even if it was a topic I was less than thrilled about learning. I don't have any bad things to say about this class. Keep up the great work!

Any other comments ?

Dr. Gallagher did a great job, especially with an another student who rudely interrupted class constantly. He showed patience with her while the rest of us did not.

What did you like about the course ?

I thought I learned most of my material by applying things I learned to activities. Dr. Gallagher also uses unique examples that I often reference to when taking tests.

What could be improved ?

Powerpoints can get boring, I liked when the professor changed it up.

What did you like about the course?

I enjoyed Dr. Gallagher's ^{attitude, organization skills} and how he makes his students critically think. The course encouraged me to apply the concepts I learned in class to every day life.

What could be improved?

I can't think of anything.

SCANTRON DE Mark Reflex® EW-273017-3:11

Any other comments?

Dr. Gallagher is an amazing professor. It helps that he is so interested in what he is teaching. He used a lot of different approaches (videos, drawings, lecture, labs) to help us learn. He can make almost anything interesting, and his sense of humor helps class go by fast. I liked all of the examples given to illustrate the concepts we were learning. It made it easier to understand.

Thank You!!

Any other comments?

By far my favorite professor here at Millersville. He makes class entertaining and enjoyable. You can tell he enjoys what he does and seems to love coming to work every day. I don't think this is actually "work" to him. Overall, great man and an excellent teacher.

Thank You!!

What did you like about the course?

Professor was always engaged and just enjoyed the material we were learning. I also thought the labs were interesting.

What could be improved?

What did you like about the course ?

I liked how everything could be applied to "real-life" situations

What could be improved ? lectures went pretty fast and I would have taken more out of them if he slowed down a little.

What did you like about the course ?

Challenged me to think

What could be improved ?

What did you like about the course ?

I really enjoyed this class and the ability to do "hands-on" class activities in lab.

What could be improved ?

Any other comments ?

Dr. Gallagher is a great professor and is very helpful and approachable.

What did you like about the course ?

I enjoyed the level of enthusiasm It made learning the required information easier.

315

8

What could be improved ?

What did you like about the course ?

Dr. Gallagher made a lot of interesting subject a lot of fun PSYC 315

What did you like about the course ?

Dr. Gallagher is an amazing teacher. He is very passionate about what he teaches and is very approachable. He expects a lot from his student but you also learn a lot.

Any other comments ?

I really enjoy this class and do highly recommend for a lab in the future! ☺

What did you like about the course ?

I liked learning about vision, especially learning the myths of vision - like how not wearing glasses really does not make your vision worse.

What could be improved ?

Use class material more

What did you like about the course ?

I enjoyed learning about what allows me to hear and perceive things. Gallagher was a great professor who really cares about the class and is passionate. 315 310 (11)

What could be improved ?

Less power points and more slower. He is available outside

What did you like about the course ?

He gave us a lot of information about things that were happening now, not just old theories.

What could be improved ?

He did a good job of getting things back, but his comments are a little vague.

Any other comments ?

Taken Gallagher for 2 courses! Love the way he teaches!

What did you like about the course ?

I enjoyed the real life applications that can come from learning about sensation and perception.

What did you like about the course ?

I liked the varied teaching methods + the experiments that helped to build the understanding of the concepts.

What could be improved ?

What did you like about the course ?

The professor! He makes all topics and subjects interesting and easy to understand.

Responds promptly to emails → AWESOME!

What did you like about the course ?

Much of the material was interesting and the professor clearly enjoyed what he was teaching, which helped make me want to learn the material.

Any other comments ?

Dr. Gallagher made dry subject material very interesting. Very enthusiastic, entertaining lectures, with demonstrations that both encourage understanding & building concepts clearly. This is my favorite class this semester.

Any other comments ?

A little overboard on reading and podcast assignments. Dr. Gallagher make any topic interesting. He is the best lecturer in the psych department.

What did you like about the course ?

I liked learning about how psychology first began because this is the first course I had that actually talked about that. This is my third class with Dr. Gallagher and I still think he's an awesome professor.

What could be improved ?

I thought that the exams focused too much on little details that we wouldn't have thought to focus on, when studying.

Any other comments ?

Dr. Gallagher was available to help student when needed, his enthusiasm for the subject kept the class interesting, I never had a problem clarifying concepts for students who didn't understand.

Thank You!!

Any other comments ?

Dr. Gallagher delivers the best lectures I've had in my undergraduate experiences at Millersville. Dr. Gallagher demonstrates interest in his students and has high, but reasonable, expectations for his students to succeed.

Any other comments ?

I really enjoyed this class even if it was challenging. The information is interesting & applies to daily life, and I really like the professor. Overall, a very good class in my opinion.

Thank You!!

Any other comments ?

Dr. Gallagher is easily my favorite professor. He is a hard grader, but the feedback is always helpful. It is refreshing to have a professor who jokes around with students and makes them enjoy coming to class.

Thank You!!

Any other comments ?

I truly enjoyed the class and the way it was taught. I have learned so much throughout the semester and am thankful to the professor for helping me to enjoy learning a tough subject.

Thank You!!

What did you like about the course ?

I liked that the course challenged me. Dr. Gallagher has high expectations for his students but will do anything to help them succeed (if students put in the effort.) He is a very respectful and enthusiastic professor.

What could be improved ?

Three question quizzes shouldn't be worth 25 points.

Dr. Gallagher,

Of all the professors here at Millersville, I feel you have helped me the most. I truly appreciate all the help you have given me since the first class that I ever took with you, Psych Stats II. I was really grateful for all of your help with advising, even when you were not officially my adviser and trying to help me with ideas for my undergraduate honors thesis. Also, I am thankful for your help last year, when I need an honors perspective class, and you allowed me to convert your Cognitive Psychology perspective course into an honors class.

Dear Dr. Gallagher,

Thank you so much for taking time out of your busy schedule to write my recommendation letter for Millersville's Clinical Psych. program. I learned so much from you during my undergraduate years. Your passion for the subjects you taught inspired me to work harder and made me a better student. Hopefully I will see you again very soon.

Respectfully,
Courtney

Finally, thank you for writing my recommendation letter for graduate school. I appreciate that you took the time to write it, and submit it to the three schools I applied to.

So thank you, for all of these things and all the other little ones along the way. Of everyone here at Millersville I express the most gratitude to you. I wish you all the best

Thank You,
Susan

Dr. Gallagher,

Thank you so much for writing the letters of recommendation for me. I truly it, as well as all of the time you have taken to help me over the past four years. You have been an exceptional professor and advisor. You have always pushed me to do well, challenged me, and therefore encouraged me to submit my best work. As an advisor, you provided me with the freedom to customize my psych degree, but were always willing to offer guidance if I was unsure. The knowledge and skills you have passed on to me will enable me to excel in graduate school and after. So thank you again for all of your help. I am grateful to have had such a positive influence in my life.

Sincerely,
Kelly

Dr. Gallagher,

Thank you so much for filling out the AmeriCorps recommendation for me. I really appreciate that you think highly enough of me to do that. You were honestly my favorite professor in college. You not only taught me so much about psychology, but even more about life. I can honestly say I believe I am a better person after taking your classes. Thank you so much again and please stay in touch!

Sincerely,

Hannah

Dr. Gallagher

Thank you so much for helping to guide me to graduate school during my time at Millsville. The classes I've taken with you have been a pleasure and I feel as if I am well prepared for grad school. I hope to bring the same intensity + enthusiasm to my future career. Also, thank you for writing grad school recommendations on my behalf. I am so excited to be continuing on in academia! Thanks again for everything, I am super appreciative!

Ryan

Dr. Gallagher,

Thank you for always believing in me when I had so much doubt in myself. Thank you for never giving up on me and encouraging me when I felt like I couldn't do it (especially in Z11). You have contributed to my academic and personal growth and now that I am graduating, I wanted to show you how much I really appreciated having you as a professor.

Thank you.

Take care,

Amy

Dr. Gallagher,

I wanted to thank you for everything that you have done for me over the past few years. Part of the reason that I've taken so many of your classes is because your continual influence helped me to keep myself motivated & to push myself to do better. I had an incredibly rough start in the beginning of my college career & it was because of you that I realized I had to focus on what was important & bring my A's up. I have a lot to thank you for & I wanted you to know that your continual belief in your students' ability to do better & your enthusiasm for every subject you teach (including stats at 8:00 in the morning) has meant a lot to me over the past few years & it's something that I'm sure will follow me in the years to come, whether that was intentional or not. Thank you for it.

Sarah

'Dear Dr. Gallagher:'

Happy Holidays and Merry Christmas!

In the stress and craziness of finals week, I would like to take a moment to express how grateful I am for all of your support this semester. I have been blessed to have you as my first psychology professor here at Millersville; you have been an amazing source of support and guidance, not only in regards to class material, but also in regards to my academic career in general. Please know that I appreciate all you have done for me as well as your endless patience with me throughout the semester. (I know that I sometimes often ask too many questions!) You have certainly gone above and beyond what's expected, and I am thankful for that!

It has been a pleasure to learn from you this semester, Dr. Gallagher. I hope you have a wonderful winter semester and a very Merry Christmas!

Best wishes, Rachel
