

# Article Review (Required)

ITEC 467, Mobile Robotics

Dr. John Wright

## Overview:

The assignment requires students to research and critique a current (less than 2 years old) article from a well-known/respected trade/practitioner magazine or a scientific journal on a topic related to Mobile Robotics. Students should have their chosen article approved by the instructor prior to developing their article review.

## Criteria:

Article Approved by instructor:

Name of Article: \_\_\_\_\_

Source: \_\_\_\_\_

Approval Signature: \_\_\_\_\_

Criteria	Criteria Weight
Was the article approved prior to completion of assignment? If not approved (signature above), the assignment will not be evaluated.	Yes/no
How well does the reviewer demonstrate his/her knowledge of the topic? Does the review use additional research to substantiate it?	0-4
Is the review written well (grammar, punctuation, flow, etc.)? How well is it organized and delivered?	0-3
Does the review conform to single-space, 1" margins, 12 point font, maximum of 2 pages (no cover pages) including works cited list (APA method)?	0-2
How does the topic impact society?	0-1

The evaluation is subjective at the discretion of the instructor based on how well the article review conforms to the above criteria. All work must be original and research cited must conform to APA or the work will be considered as academic dishonesty. Please review the University policy on Academic Dishonesty prior to starting this assignment:
