

NSPE's Code of Ethics

AENG 101, Introduction to Engineering
Dr. John Wright

Directions:

Develop a one-page synopsis (single-spaced, 1" margins, 12pt font) that summarizes The National Society of Professional Engineer's (NSPE) Code of Ethics.

The synopsis is to be written in first person. The depth of this explanation will be the primary driver of your paper's evaluation. You must support your work and focus on the following:

- 1) The Engineer's Obligation to Society
- 2) The Engineer's Obligation to Employers and Clients
- 3) The Engineer's Obligation to Other Engineers

Please note that the expectation for this assignment is a full page of written work. Please do not go over 1-page, however. You are to balance depth and brevity.

This assignment is worth 5% of your total semester grade.
