Calculus I Summer Session II 2018 MATH 161.01 (4 credits), MTuWThF, 10:00A-12:15P, Wickersham 218

Prerequisites: A grade of C- or better in MATH 160 (Precalculus) or MATH 161 Placement.

Instructor: Dr. Buchanan

Office: Wickersham 217-1, Phone: 871-7305, FAX: 871-7948 Office Hours: 09:00A-09:50A (MTuWThF) or by appointment

Email: Robert.Buchanan@millersville.edu

Textbook: Calculus: Early Transcendental Functions, 4th edition, Robert T. Smith and Roland B. Minton, McGraw-Hill Company, New York (2011), ISBN 978-0073532325.

You will also need a graphing calculator such as the TI-84 Plus.

Objectives: MATH 161 introduces the concepts and techniques of calculus, beginning with limits. Major emphasis is on the theory and applications of continuity, derivatives, antiderivatives, and the definite integral. The calculus of the trigonometric, exponential, and logarithmic functions is also included. Upon successful completion of this course a student will have learned to

- find the limits of elementary, rational, and some transcendental functions,
- differentiate elementary, rational, composed, and some transcendental functions,
- apply derivatives to situations involving rates of change, velocity, and acceleration,
- apply derivatives in situations requiring the optimization of a quantity,
- integrate elementary, rational, composed, and some transcendental functions.

Overall students will gain an appreciation for the great intellectual achievement that is the development of the calculus.

Course Contents: If time permits other topics may be covered as well.

- Limits and continuity (Chap. 1)
- Differentiation (Chap. 2)
- Applications of the derivative (Chap. 3)
- Integration (Chap. 4)
- First-order differential equations (Sec. 7.1 and 7.2)

Attendance: Students are expected to attend all class meetings. If you must be absent from class on the day an assignment is due, you must complete and hand in the assignment prior to the absence. If you know you will be absent on the day of a test, you must notify me before the time the test is scheduled in order to schedule a make-up test. Students who miss a test should provide a valid excuse, otherwise you will not be allowed to make up the test. No final exam exemptions.

Merely attending class will not earn you a passing grade. Regular class attendance (see Class Attendance Policy) includes being on time to class and actively engaging and participating in classroom activities. It does not include texting, listening to music, watching videos, browsing the internet, playing video games, checking email, etc. Students engaging in these types of activities may be asked to leave the classroom and/or be counted absent for the class meeting. Do not expect a warning or announcement before these sanctions.

Homework: Students are expected to do their homework and participate in class. Students should expect to spend a minimum of three hours outside of class on homework and review for every hour spent in class. Homework exercises help students review and reinforce concepts covered in class. The textbook exercises are arranged in a generally increasing level of difficulty. Working only the low-numbered exercises will not prepare a student sufficiently for the test and final examination exercises. All assigned homework exercises must be worked until successfully completed. Homework assigned for a grade will be collected daily, graded, and returned to the students during the next class meeting. A homework assignment may be submitted late for full credit provided the graded assignment has not been returned to the students who submitted it by the due date and the answer key has not been posted under D2L.

Tests: There will be four tests and a comprehensive final examination. The tests will take place during the final hour of each Monday's class meeting except for the first Monday (06/17/2019). During the final class meeting (Friday, 07/19/2019) there will be a two-hour comprehensive final examination. I will not "curve" test or exam grades.

Grades: Course grade will be calculated as follows.

Tests	15% each
Homework	25%
Final Examination	15%

Tests and the final examination will be graded individually on a 100-point scale. I keep a record of students' test, homework, and exam scores. Students should also keep a record of graded assignments, tests, and other materials. As an example of the calculation of the numerical course grade, suppose a student's four test grades were 87, 78, 65, and 70 (out of a maximum of 100 points on each test), the student's final examination grade was 71 (again, out of a maximum of 100), and the student's homework grades were 80, 82, 71, 59, 75, 88, 94, 64, 96, and 50 (there will probably be more than 10 graded homework assignments). This student's test and homework average are 75 and 75.9 respectively. The student's numerical course grade is then

$$(75)(0.60) + (75.9)(0.25) + (71)(0.15) = 74.625 \approx 75.$$

The course letter grades will be calculated as follows. I will not "curve" course grades.

90-92	A-	93-100	A		
80-82	В-	83-86	В	87-89	B+
70-72	C-	73-76	С	77-79	C+
60-62	D-	63-66	D	67-69	D+
		0-59	F		

Calculator Policy: Frequently examples, homework exercises, and tests will make use of a graphing calculator. The Department of Mathematics recommends the TI-83/84/85/86 model calculator for students in elementary calculus. The TI-89/92, TI-Inspire, or any other calculator with symbolic or computer algebra capabilities is not permitted to be used in this course.

Course Repeat Policy: An undergraduate student may not take an undergraduate course of record more than three times. A course of record is defined as a course in which a student receives a grade of A, B, C, D, (including + and -) F, U, Z or W. The academic department offering a course may drop a student from a course if the student attempts to take a course more than three times.¹

¹Memorandum to mathematics faculty from Dr. Charles G. Denlinger, Assistant Chair, Department of Mathematics, August 30, 2004.

- **Inclement Weather Policy:** If we should miss a class day due to a school delay or cancellation, any activities planned for that missed day will take place the next time the class meets. For example, if a test is scheduled for a day that class is canceled on account of snow, the test will be given the next time the class meets.
- Cell Phones: Silence (or better yet, turn off) all cellular telephones upon entering the classroom. Leaving class to initiate or receive a telephone call will not be tolerated and students doing so will not be readmitted to the classroom until the following class meeting. Texting or tweeting during class interferes with the learning process. Students distracted by their cell phones are not engaged in class and will find, over the course of the semester, that learning and course grade will suffer.
- Title IX Reporting Responsibilities: Millersville University and its faculty are committed to assuring a safe and productive educational environment for all students. In order to meet this commitment and to comply with Title IX of the Education Amendments of 1972, 20 U.S.C. §1681, et seq., and act in accordance with guidance from the Office for Civil Rights, the University requires faculty members to report to the University's Title IX Coordinator incidents of sexual violence shared by students. The only exceptions to the faculty member's reporting obligation are when incidents of sexual violence are communicated by a student during a classroom discussion, in a writing assignment for a class, or as part of a University-approved research project. Faculty members are obligated to report to the person designated in the University Protection of Minors policy incidents of sexual violence or any other abuse of a student who was, or is, a child (a person under 18 years of age) when the abuse allegedly occurred. Information regarding the reporting of sexual violence, and the resources that are available to victims of sexual violence, is available at https://www.millersville.edu/titleix/title-ix-policies-and-procedures.php.
- **Final Word:** Math is not a spectator sport. What you learn from this course and your final grade depend mainly on the amount of work you put forth. Daily contact with the material through homework assignments and review of notes taken during lectures is extremely important. Organizing and conducting regular study sessions with other students in this class will help you to understand the material better.

No one can guarantee you success in this course. Your responsibilities and the instructor's expectation are outlined above. There will be no second chances, "do-overs", or extra credit assignments.
